

*Fabric Information*

**Supplier Name** Anzea Textiles **Telephone No.** 817-336-2310  
**Address** 200 N Vacek Suite D Fort Worth Tx 76107  
**Product Name** To Close To Call Collection  
**Content** Nylon microfiber matrix  
**Finish**

*General Maintenance*

While all of our coated fabrics are inherently stain resistant, it is important to keep them clean at all times to maintain the original look and feel. Spot cleaning with soap and water will remove most of the everyday soil. Vacuum regularly and promptly treat stains and spots.

*Bleach Cleanable*

This product is cleanable with 1:10 dilution ratio of bleach and water. Allow the mixture to linger for the time specified by the Centers for Disease Control and Prevention. Rinse with clean water and dry with a soft clean cloth.

*Approved Cleaners*

- This list represents some of the most common options available and is not intended to be comprehensive.**
- Alcohol Solution (17%)
  - Birex se
  - Bleach solution (10%)

  - Virex II 256
  - Virex TB

**RINSE THOROUGHLY AFTER CLEANING WITH WATER AND WIPE WITH A CLOTH TO DRY. RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCTS APPEARANCE IF NOT REMOVED.**

NYTEK,® a specially engineered nylon fiber matrix, is designed with a built-in stain resistant finish that will not wash or wear off and does not require a topically applied spray. The following simple cleaning methods will help maintain long-lasting qualities.

*Ordinary cleaning*

Ordinary dirt, smudges and water-soluble stains such as coffee, tea, juice, soft drinks, milk, beer and wine can be removed with mild soap and water. Use a clean cloth or soft sponge to dab the stain with soapy water. Remove the soap solution by wiping the area with a cloth and clean water. Dry with a soft lint-free cloth or towel.

*Stubborn Stains*

Very stubborn stains or non-water soluble stains can be removed with a mild solvent such as naphtha, lighter fluid and paint thinner. Lightly wipe the stain with a clean cloth moistened with solvent. Blot the area with a dry cloth and dry.

*Ink and Magic Marker Stains*

Many ink and magic marker stains can be removed using a solution of one part Wisk detergent and one part rubbing alcohol. Dab lightly with a moist cloth, but do not rub. As the ink loosens, blot the area with a dry cloth. Repeat if necessary. Rinse with a cloth dampened in clean water, and dry with a soft cloth.

*Commercial Installations*

For general cleaning of commercial installations, use mild soap and water. Avoid using cleaners containing abrasives or bleach. Disinfectants can be used provided they are evaluated beforehand. Technical bulletins outlining specific cleaning and disinfecting procedures for NYTEK® products used in health care applications are available.

The cleaning recommendations above are just a guide and intended to guide maintenance of fabric care. Per Anzea Textiles warranty: The warranty does not cover ink stains, dye stains, cuts, punctures, burns and forms of abuse including those that are unintentional. The warranty does not cover damage resulting from lack of cleaning, the misuse of cleaning agents or the use of inappropriate cleaning agents for the product.
